

# Dingaling iPhone Application Features

## Dingaling Calls

Make long distance and international calls to over 150 countries at very low rates.

It's great for local calling too when you have used up your monthly phone minutes and you. A few cents a minute sure beats 25, 30 and 40+ cents a minute.

## Rates Listing

Keeps you up-to-date on our current calling rates to over 150 countries.

Just scroll through the list of countries and the one that you are interested in. In moments that screen is updated with that rates for that country.

## Call Your iPhone Contacts

The Dingaling App gives you access to all of the contacts that you have in your iPhone Contact list. It's just like making a regular call from the address book.

## Call History

Keep track of your recent call history. All the recent phone calls that have been made using any of our Dingaling communications products will be shown in the call history

## Add to Your Balance in the App

When you are running low on funds in your Dingaling account you can always add to your balance without exiting the app.

## Make Calls over WiFi and 3G

Calls can be made over both Wifi and 3G internet connections.

Make a call to a friend using the free Wifi connection at a coffee shop and all you pay is the low per minute Dingaling rate.

Calling over 3G is handy when there is no free wifi to be found or you have no more voice minutes. The pay for the cost for data and the low per minute Dingaling rate. That sure is better than the cost of extra voice minutes.
